

Essex Health and Sport England Active Design Principles Integrated Impact Assessment Checklist (2022)

(adapted from the London HUDU Rapid Health Impact Assessment (HIA) tool 3rd edition and WHIASU Health Impact Assessment tool66)

This is an interactive document, click on the box to fill in the forms.

About this new guidance

This provides a new, updated and improved Essex Healthy Places Guidance checklist. Please note that the rest of the wider Essex Healthy Places Guidance remains unchanged at this time. This checklist is provided to enable HIAs to be produced in detail by planning applicants (see weblink provided above to view guidance on approach and methodology). It is acknowledged that a number of checklists of this nature have already been developed, such as the Sport England Active Design guidance and checklist. The key aims in revising and updating the Essex Healthy Places Guidance checklist at this time (2023) are to provide a shorter, simpler and more user-friendly methodology. The new checklist draws heavily on existing good practice work and seeks to combine key elements of other existing checklists, including that cited above; the London HUDU Rapid HIA tool 3rd edition; and Welsh HIASU HIA tool.

This supports and complements the HIA guidance hosted on the Essex Design Guide webpages and has been designed to align with and help enable implementation of the Essex Livewell Development Accreditation system established to demonstrate how developments have been planned carefully to place promotion of health and wellbeing at their core. The checklist sets out a comprehensive range of high-quality development principles and considerations in order to help scheme designers / developers to prepare better development proposals and to raise the quality of design, including promoting health and wellbeing but also promoting better outcomes across the board. The comprehensive scope of considerations covered aims to reflect the broad nature of the wider determinants of health.

Although this new guidance builds upon and complements the <u>Essex Livewell Development Accreditation</u>, the two do not serve exactly the same purpose. It is intended that by using this guidance and checklist to develop better designed developments this will help scheme designers and applicants towards achieving the Livewell accreditation in recognition of the quality of these.

On a positive note, this guidance seeks to promote and ensure better quality designed developments and this in the interests of all concerned. However, the absence of building in good healthy design principles can have long term detrimental effects on the quality of the living environment and the health and wellbeing of residents. This may include negative traits such as increasing health inequalities within the population, inactivity, overweight, obesity and mental health issues. Accordingly, Essex local planning authorities (LPAs) will expect to see evidence that applicants / developers have engaged with a positive design process using healthy design principles and in that regard the use of this guidance is recommended strongly.

How to use this guidance and checklist

The guidance / checklist can be and is best referred to at the outset of scheme design in order to help design proposals to a higher standard. It is acknowledged that at that very early stage, it will generally not be possible to answer many of the questions posed. However, this can be used and completed incrementally throughout the progress and evolution of proposals as further detail becomes available and questions can then be answered more fully and completely, as 'answers' become clearer and more defined. In this way, like sustainability appraisal, the HIA exercise should be approached and developed in an iterative way and elements of developments may be improved and redesigned if necessary, as a result of findings and feedback from earlier stages of completing the HIA checklist. The comments columns for each criterion are provided to show explicit analysis and findings in each case and a numbered list is provided at the end of the checklist to summarise key findings and conclusions to draw upon.

For clarity, comments should provide a brief description to support the response / answer to the question. If the question is not applicable to the proposal, please make this clear within the comment section as to why.

Potential impact on health and wellbeing should be assessed as positive, neutral or negative.

The length of effect should be described and if temporary, please provide an estimate of timescale.

Mitigation should be included where applicable; if unsure of actions, please state.

Sport England's Active design criteria can be found <u>here</u>. The active design principle/s that the question responds to are detailed in the questions below in brackets.

Contents

Background Information	
1. Active and sustainable environments / Sustainable Travel	
2. Design of Homes and Neighbourhoods	
3. Provision of / Access to green, blue and open spaces	1
4. Supporting communities and neighbourhoods for the life-course	
(mainly for public realm)	1
5. Access to healthier food environments	1
6. Access to education, employment, skills and training	2
7. Access to healthcare infrastructure and self-care	2
8. Environmental sustainability / addressing health impacts	2

Background Information	
Name of assessor	
Date	
Proposal name and location	
Planning application reference	
Engagement with health partners? (local authority PH teams, NHS estates team, local authority social care team, CCG, acute trust etc)- describe who and which stages of application Provide summary of outcomes from engagement, e.g. scheme changes and improvements incorporated	
Will this application be submitted to Essex Quality Review Panel or other quality review panel in the future?	
Will this HIA seek to show the scheme's eligibility for the voluntary Livewell Development Accreditation scheme? If so, please be aware of accreditation criteria on EDG webpages here	

1. A	1. Active and sustainable environments / Sustainable Travel								
1	Criteria	Yes/No or N/A (e.g N/A if a residential	Comment	Impact	Length of Effect	Impacted Groups	Mitigation Proposed		
1.1	Is a diverse mix of land uses such as homes, schools, shops, workspace, relevant community facilities and open space provided on site or within a comfortable (800m) walking distance? Is a broader range of land uses available within 5km cycling distance? (ADP2)								
	Does the proposal prioritise pedestrian, cycle and public transport access ahead of the private car?¹(ADP3)								
1.3	Are the non motorised rout—es provided, where feasible and appropriate in wider place making terms, shorter and more direct than vehicular routes? (ADP3)								
1.4	Does the proposal promote a legible, integrated, direct, safe and attractive network of walking and cycling routes suitable for all users and that encourages people to use these readily? (ADP3)								

1.5	Have off road routes been designed			
	to enhance the user experience (and			
	comfort). Consider places to stop (and			
	rest or enjoy spaces) at regular intervals;			
	need for shade during heat or shelter			
	during wet weather; the benefit of adding			
	interesting features along the routes			
1.6	Is appropriate provision made to promote			
	access to, and activity by, all users			
	including providing safe route ways			
	for vulnerable pedestrians? (ADP6)			
	Are shared pedestrian and cycle ways			
	clearly demarcated, taking the needs of			
	the vulnerable pedestrian into account?			
	(ADP 1 & 3)			
1.7	Are walkable communities created,			
	providing opportunities to facilitate			
	initiatives such as 'walking buses' to			
	school, and providing the basic pattern			
	of development to support a network of			
	connected walking and cycling routes			
	(ADP 3)?			
1.8	Are the walking and cycling routes			
	provided safe, well lit, overlooked,			
	welcoming, and well maintained, durable			
	and clearly signposted? Do they afford			
	clear sight lines to help avoid blind			
	corners? (ADP3)			

1.9	Are streets and spaces of a high quality, with durable materials, street furniture and signage? (ADP 6)			
1.10	Do pedestrian and other active travel routes consider air quality and traffic exposures that may impact as part of			
	pedestrian safety?			
1.11	Does the development integrate with existing transport infrastructure and services, or enhance or provide new passenger transport services to the site? Has the developer engaged with the LPA on providing sustainable access to facilities and services?			
1.12	Has the developer provided the means to facilitate digital transport infrastructure (e.g. RTPI ²)?			
1.13	Have sustainable travel plan(s) been developed, approved and funded for the construction and operational phases?			

¹ This may apply more in designing such routes over a major site area. Other good practice placemaking principles should also be taken into account.

² Real Time Passenger Information (RTPI)

2. D	esign of Homes and Neighbou	urhoods					
2	Criteria	Yes/No	Comment	Impact	Length of effect	Impacted groups	Mitigation proposed
2.1	Is there a mix of homes with different tenures distributed throughout the proposal? ³						
2.2	Are homes both internally and externally designed to be adapted for arising health and wellbeing needs i.e. room adaptation, door widening, space to support mobility equipment? (See 'Livewell' Guidance)						
2.3	Does the development have any specialist housing provision proposed?						
2.4	Have homes been built to a recognised buildings standard or quality mark? Do homes meet Building Regulations part M / has development achieved the voluntary national Home Quality Mark framework/ BREEAM standards to showcase the quality of the homes? Or with Livewell Development Accreditation or BRE quality mark?						

2.6	Is there an appropriate (LPA policy compliant) allocation / mix of affordable housing and if so, at what percentage? ³ During which phase/s will those affordable homes be released?			
2.7	Do homes have dedicated / appropriate space to allow for working from home?			
2.8	Do homes meet or exceed the nationally described space standards? Have buildings been designed to provide appropriate amounts of internal space for rooms along with circulation and external space? (ADP8)			
2.9	Do homes have access to green space on-site i.e. garden, public open space or useable amenity space?			
2.10	Are homes and all external spaces accessible for all users including people with additional needs?			

³ Refer to the LPA's adopted Local Plan policies, plus relevant SPD (if in place for the LPA) and if necessary, the current SHMA / Housing Needs Assessment

3. Pr	ovision of / Access to Gre	en, Blue	and Open Spaces				
3	Criteria	Yes/No	Comment	Impact	Length of effect	Impacted groups	Mitigation proposed
3.1	Are new civic and other						
	open spaces and green						
	/ blue infrastructure						
	welcoming, safe and						
	accessible to all and of						
	an appropriate scale and						
	design to allow a range of						
	possible functions and to						
	be multifunctional in nature						
	wherever possible? Please						
	explain the approach taken						
	to multifunctionality, describe						
	the functions provided for						
	and how this is delivered						
	(ADP 5, 6) (Also see						
	'Livewell' guidance) ⁴						
3.2	Is there a multitude of						
	seating options provided?						
	Is the seating provided						
	accessible to all? (ADP 7)						
3.3	Do new walking and cycling						
	routes integrate with the						
	existing open space and						
	green infrastructure network						
	of the area? (ADP3)						

4	Do the proposed open			
	space and sport / recreation			
	facilities link to existing			
	networks and walking and			
	cycling routes (including			
	those beyond the site)			
	plus wider GI networks,			
	residential areas and			
	employment / commercial			
	areas? (ADP3 & 5)			
5	Are the sports and recreation			
	facilities (including green			
	/ blue infrastructure)			
	appropriately designed			
	and located in relation to			
	neighbouring uses? (ADP5)			
6	Are the sports, physical			
	activity spaces and			
	recreation facilities being			
	provided designed in			
	accordance with best			
	practice guidance or			
	recognised design standard?			
	(ADP5)			
7	Are informal facilities for			
	physical activity provided,			
	such as natural play,			
	Greenline routes or nature			
	traile2 (ADD2)			1

3.8	Will the development			
	retain, add to and / or			
	enhance green and / or blue			
	infrastructure to support			
	healthy living, physical			
	activity and for nature?			
3.9	Have issues such as the			
	servicing of green spaces,			
	grass pitches, the impact			
	of noise, floodlighting or			
	vehicular access been			
	considered? (ADP 9)			
3.10	If open space has been			
	lost, what compensatory			
	measures have been made?			
3.11	Has the approach to GI and			
	blue infrastructure provision			
	been shaped by the Essex			
	GI Standards and Principles?			
	If not, adherence to Natural			
	England's own GI Standards			
	for England is considered an			
	appropriate alternative ⁵			
3.12	Are new GI and play /			
	recreation facilities planned			
	to be easily accessible (in			
	walking distance) to the new			
	homes provided?			

See Essex Green Infrastructure Standards and Principles
 See Essex GI Standards and Principles on EDG webpages
 Younger people's play facilities this suggests a distance of 400-480m, although a 800m distance is considered accessible for larger facilities including those for neighbourhood youth play / recreation areas

4	Criteria	yes/no	comment	impact	length of effect	impacted groups	mitigation proposed
4.1	Are large, single purpose uniform land uses avoided as an overall approach? If not, will such spaces be flexible to adapt as may prove necessary? (ADP2)				Circot	угоира	proposed
4.2	Is a range and mix of recreation, sports and play facilities and open spaces provided to encourage physical activity across all neighbourhoods and prominently located? (ADP1/4)						
4.3	Where sports (or recreation) facilities are provided, are multiple facilities located in one place, to allow choice of activity? (ADP4)						
4.4	Has consideration been given to how facilities and open spaces are to be managed so to encourage a range of activities to allow all to take part, including activities for all genders, all ages and all cultures? (ADP1)						
4.5	Do the range of sport and physical activity opportunities to be provided specifically support the identified health and wellbeing issues in the local area ? (ADP1) ⁷						
4.6	Does the proposal promote the co-location and concentration of key retail, community and associated uses? (ADP4)						

Have you considered how you will promote				
varied and innovative (active) initiatives				
for all groups when the development is				
delivered? This includes how to reach all				
members of society and how to target hard				
to reach groups. (ADP1)				
Are open spaces, sport / recreation facilities,				
workspaces (where provided) supported as				
appropriate by public conveniences, water				
fountains and, where appropriate, showers				
& changing facilities to further increase their				
appeal to all? These also need to be usable				
by all users (ADP1 & 7)				
Is safe and secure cycle parking provided				
for all types of cycles including adapted				
cycles and trikes ⁸ ? (ADP 7)				
Is safe and secure nuchehoir storage		-		
Is safe and secure pushchair storage				
provided where appropriate? (ADP 7)				
Will the facilities target the broadest possible				
range of users, with particular emphasis on				
disadvantaged groups? (ADP 9)				

4.12	Has the access strategy been designed to ensure safety for pedestrians, cyclists and drivers?			
4.13	Has a designing out-crime or secured by design standard been used?			
4.14	Have dementia and autism friendly design principles been used across the development?			
4.15	Is Wi-Fi provided in facilities and spaces? (ADP 7)			
4.16	Has a community engagement strategy been developed? What contribution has the community had in developing this? Will a community development resource be provided (may be for larger sites only)?			
4.17	Will residents receive a welcome pack that describes community activities and support when they move in? This may also be used to provide sustainable travel information, such as that on local bus / train services			
4.18	How will technology and social media be used to publicise / promote activities or encourage activity? (ADP 10)			

4.19	Will local champions be identified to help ensure the sport and physical activity benefits of the development will be realised and how will the local champions be adequately supported? This role should also cover management, care & use and of wider GI (ADP 10)				
4.20	Have programs for monitoring and evaluating the success of initiatives (and the wider development) been considered? (ADP 9)				
4.21	Is the proposal designed to support and integrate with the wider existing community i.e. connectivity from outside of the proposal linking to new social / community infrastructure? Connectivity to / from the new proposal to outside the site?				
4.22	If yes to the previous questions, at what stage will pedestrian and cycling routes be provided and linked up?				
4.23	Has consideration been given to alternative stewardship models to provide for longterm, sustainable management and maintenance in perpetuity, other than local authority management of all assets, e.g. public realm, streets, SUDs and formal open green and blue space? (ADP 9)				

Refer to relevant Health & Wellbeing strategies; Joint Strategic needs Assessment (<u>JSNA 2022</u>); district profiles
 This includes public spaces, facilities etc., as well as all types of homes
 Refer to the relevant local planning authority's Statement of Community Involvement, which may provide guidance and principles for this

5. A	ccess to Healthier Food Envi	ronments					
5	Criteria	Yes/No	Comment	Impact	Length of effect	Impacted groups	Mitigation proposed
5.1	Is there room in the kitchen (or utility area) space for a freezer?						
5.2	Do homes have a separate space for dining (to enable communal dining)?						
5.3	Does the development provide new or improve existing allotments, community shared growing spaces or provide for personal food growth? 10						
5.4	Does the proposal include / enable on-site (or nearby) access to supermarkets, local shopping parades or precincts, farmers markets (or other means of access to healthy food and drink)? See also 5.6 below						
5.5	Does the above provision support safe and secure cycling parking?						
5.6	Are the majority of these outlets within a comfortable 800m walking distance or within a 5km cycle ride?						
5.7	Does any on-site provision include new hot food take-away provision? 11						

5.8	If yes, will the new hot food take-away provision be within 400m of schools or places that			
5.9	What percentage of the total on-site food provision will be allocated to hot food take-aways uses? (Calculate by number of outlets)			
5.10	If no on-site food sales provision, does the proposal provide connective routes to existing provision and provide wayfinding to this (including in the new residents' welcome pack)?			
5.11	Do on-site passenger transport options provide a link to healthy local food provision?			

¹⁰ his may take the form of domestic garden space if these are large enough to allow for home food cultivation. Community growing spaces could include community orchards, for example This is likely to require particular attention within the HIA

¹² Or other nearby, accessible passenger transport facilities, such as bus stops just off site

6	Criteria	Yes/No	Comment	Impact	Length of effect	Impacted	 Mitigation
	Ontona	103/140	Comment	Impaot	Length of effect	groups	proposed
6.1	Does the proposal include					9	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
	educational (or other learning)						
	premises and have these been						
	agreed with Essex County Council						
	(or other LEA)?						
6.2	Has the Essex Design Guide Schools						
	Design information been taken into						
	account?Will the education / learning						
	facilities include provision of green						
	space(s)?						
6.3	Will the educational / learning						
	premises have a car-free or car						
	restricted and safely designed						
	pedestrian zone around it?						
6.4	If no car-free (or car restricted)						
	zone, what road safety and air						
	quality measures are included in the						
	proposal? This may include active						
	travel routes, for example, or suitable						
	public transport access nearby						
6.5	Does the proposal include						
	employment or commercial space,						
	or shared / communal workspace						
	areas?						
6.6	Is an economic / employment						
	strategy being developed as part of						
	this proposal?						

	4		_		
6.7	Are educational / learning premises				
	and employment centres well located				
	in relation to surrounding walking				
	and cycling routes, with direct access				
	by these modes prioritised over				
	vehicular modes? (ADP8)				
6.8	Has provision been made for safe				
	/ secure cycle storage, including				
	spaces within buildings i.e. for				
	workplaces have showers and				
	changing facilities been provided?				
6.9	Have active travel routes to				
	educational and key employment				
	centres been connected to the				
	development at the earliest phase so				
	to reduce motorised travel need?				
6.10	Are there links to sustainable travel				
	provision including public transport				
	within a comfortable 5 minutes				
	walking distance to educational				
	premises or employment sites?				
6.11	In educational premises and				
	workplaces, is the use of stairs				
	promoted (over the lift or escalators)				
	utilising signage and creating				
	spacious and clean stairwells that				
	are welcoming? (This should be				
	balanced with the need to ensure lifts				
	etc. are easily accessible for those				
	who cannot use the stairs) (ADP8)				

	Have innovative design features within buildings and surroundings been utilised which encourage activity e.g. feature staircases, cycle access ramps or other architectural features? (ADP8)			
6.13	Does the public realm around sites encourage social interaction and address personal safety and comfort?			
	Has the early years team at Essex County Council (or other responsible authority) been engaged with discussions on early years / childcare provision?			
6.15	If there is early years / childcare provision, is it within active travel distances to employment or educational sites ? ¹³			
6.16	Does the construction phase provide training, skills or employment opportunities to local people either directly or via supply chains?			

¹³ This is to enable convenient linked trips for parents or other child carers

7. A	ccess to Healthcare Infras	structur	e and Self-Care				
7	Criteria	Yes/No	Comment	Impact	Length of effect	Impacted groups	Mitigation proposed
7.1	Has the relevant NHS						
	estates group been						
	contacted about this						
	proposal? i.e. Integrated						
	Care Partnership (ICS), or						
	NHS etc. health partners						
7.2	Has the proposal considered						
	the wider impact on local						
	hospitals, primary care,						
	community health services,						
	dental and mental health						
	services? Please state						
	engagement and signpost to						
	sources / outcomes						
7.3	Has pharmacy provision						
	been considered using						
	the most up-to date						
	pharmaceutical needs						
	assessment (PNA) 14?						
7.4	Has the proposal considered						
	the impacts on social care? 15						
	Please state engagement 16						
7.5	Has the development						
	considered access						
	requirements / capacity of						
	blue light services? (Please						
	state engagement).						

7.6	Does the proposal have			
	onsite health and care			
7.7	Have funding and land /			
'''	premises for the above			
	proposal(s) been agreed with			
	the relevant health bodies?			
7.8	Is the onsite facility stand-			
1 .0	alone or part of a hub			
	complex?			
7.9	if an on-site facility is to be			
	provided is that facility in			
	the most accessible location			
	(walking radius) and is it			
	served by a bus route?			
7.10	Does the facility have			
	capacity / flexibility for			
	modular / incremental			
	growth?			
7.11	If no on-site facility provided,			
	has an assessment been			
	made of the impact this			
	proposal will have on			
	existing GP and primary			
	care provision? Please state			
	sources used i.e. CCG direct			
	information, NHS choices etc			

As at early 2023, this is provided by the PNA 2022-2025 (updated 2022)
 The ECC Adult Social Care Business Plan 2021-2025 may be referred to in this context
 Contact information (ECC ASC general contact)
 Refer to current Building Regulations (for minimum provision requirements)

²¹ This reflects the requirement for developments to deliver Biodiversity New Gain (BNG) and in recognition of the health and wellbeing benefits of connecting with nature

8	Criteria	Yes/No	Comment	Impact	Length of effect	Impacted groups	Mitigation
							proposed
.1	Has the proposal been designed						
	to comply with the LPA's						
	sustainability / climate change /						
	net zero policies / SPD, criteria or						
	checlklist?						
3.2	Has an environmental statement						
	been prepared for this proposal						
	that includes a chapter on						
	population and human health ¹⁷ ?						
.3	If yes, were public health officer(s)						
	part of scoping process?						ļ
.4	Has the local environmental						
	health team been engaged						
	with this proposal for elements						
	related to human health and						
	environmental protection						
	(examples include air quality,						
	noise, contaminated land etc)?						
.5	Have homes been designed to						
	minimise carbon release and						
	energy use through passive						
	design measures (such as natural						
	ventilation and solar orientation),+						
	provision of renewable energy						
	sources and use of low carbon						
	materials and technologies?						

8.6	Has social infrastructure such as			
	community buildings, employment			
	spaces, schools and/or healthcare			
	buildings been designed to			
	minimise carbon release and			
	energy use through passive			
	design measures (such as natural			
	ventilation and solar orientation),			
	provision of renewable energy			
	sources and use of low carbon			
	materials and technologies?			
8.7	Do homes and other buildings			
	have measures to support cooling			
	during periods of excess heat,			
	prioritising natural measures 18			
	and avoiding mechanical cooling			
	wherever possible (to minimise			
	carbon release)?			
8.8	Do streets and open spaces			
	provide areas of shade?			
8.9	Is the development designed			
	to be resilient and adaptable to			
	climate change? Explain how.			
8.10	Have air quality impacts of the			
	development been assessed and			
	avoidance / mitigation measures			
	been detailed?			
8.11	Have water conservation			
	measures been included for the			
	proposal, including for homes?			

8.12	Have impacts of potential			
	flooding been taken account for			
	this scheme and has the LLFA ¹⁹			
	team, / Environment Agency had			
	input into plans?			
8.13	Has renewable, clean energy			
	infrastructure been built into the			
	development to support travel			
	such as electric car charging			
	points? (Explain the approach to			
	provision.)			
8.14	Are homes sited and orientated			
	to mitigate noise intrusion to both			
	inside and outside spaces in a			
	way that maintains a high quality			
	of local environment, public safety			
	and design quality?			
8.15	Are educational / learning facilities			
	sited and orientated to mitigate			
	noise intrusion to both inside			
	and outside spaces in a way that			
	maintains a high quality of local			
	environment, public safety and			
	design quality?			
8.1 6	Does the proposal maintain or			
	enhance biodiversity ?			

¹⁷ Alternatively, a free-standing HIA could provide the equivalent information (in a different document format)

18 The potential to maximise the benefits of spaces such as roofs and walls in urban area i.e. green roofs and walls to aid cooling, shading, while benefiting biodiversity needs to be considered.

¹⁹ LLFA – Lead Local Flood authority. These are upper tier local authorities, e.g. Essex County Council, Southend on Sea City Council, Thurrock Borough Council
